POUR HOMME

Distinguishing itself by its superb clarity and well balanced audio spectrum and option to tune the treble and bass setting to each listening preference, the **iCube II™** will quickly become your best iPod buddy. Specialised sound engineers have tuned the speakers and amplifier of the **iCube II™** to optimize the listening experience.

The **iCube II™** features an integrated docking station which is compatible with all iPod models. The included detachable audio-in cable allows you to connect the **iCube II™** to the iPod shuffle or any other MP3 player, computer or DiscMan. You can also connect the **iCube II™** to your home stereo by using the included, detachable audio-out cable.

By use of the standard iPod cable connected to the back, the **iCube II™** can be connected to your computer to become a docking station to synchronize your iPod with the iTunes software on your computer and to charge your iPod while it is inserted in the **iCube II™**.

All together the **iCube II™** stands for high-value for money; great sound, refreshing design, new useful functions and all based on our high-quality standards.
