

T-Mobile cameo

T-Mobile stick together

The T-Mobile cameo manufactured by Parrot allows you to sit back and enjoy your friends' and families' spontaneous, on-the-go adventures captured on their phone. Beyond the ordinary digital picture frame, the cameo allows your loved ones — regardless of the network — to send real-time pictures directly to the frame's dedicated phone number via MMS and e-mail.

Share moments with loved ones near or far by sending a picture postcard to their frame. With a one-time acceptance option of phone numbers, friends' and families' photos will appear instantaneously, making it seem like memories were made together.

Regardless if the cameo is a gift for yourself or someone else, sharing mobile memories just became a favorite activity for all to enjoy.

T-Mobile cameo features include:

- Leather, seven-inch frame stands vertically or horizontally — automatically rotates and resizes all photos
- Receives real-time pictures directly to the frame via MMS and e-mail from a camera phone
- T-Mobile and non-T-Mobile customers can send photos to the frame
- Built-in T-Mobile connectivity
- Memory: 64 MB
- Expandable memory with micro-SD
- Dimensions: 8.8 x 7.0 x 1.0 inches
- Seven-inch display, 720 x 480 pixels

Availability:

T-Mobile customers can purchase the cameo at select T-Mobile retail stores beginning in mid November for \$99.99 with a \$9.99 monthly reoccurring charge, which includes unlimited messaging to the frame.
